Experts in floors

BEAUTIFUL FLOORS THAT LASTS FOR LIFE

DK // For os er træ en livslang lidenskab. Det er også et speciale, som vi udvikler hver dag. Vores trægulve giver liv til ethvert rum ved at bringe naturen indenfor. Trægulvet er et smukt og historisk populært byggemateriale, som skaber de perfekte rammer om dit liv.

Vores trægulve skal opleves. De er ikke alene smukke. De er naturligt dansk design udført med respekt for æstetik – i markedets bedste kvalitet.

Hos Moland har vi i knap 30 år produceret gulve med stor respekt for håndværket, træets oprindelse og naturens begrænsninger.

UK // For us, wood is a lifelong passion. It is also a speciality that we develop every day. Our wooden floors give life to any room by bringing nature indoor. The wooden floor is a beautiful and historically popular building material that creates the perfect settings for your life.

Our wooden floors have to be experienced. They are not just beautiful, but also represent natural Danish design with a respect for aesthetics – and the best quality on the market.

At Moland we have produced floors with great respect for craftsmanship, the origin of the tree and the constraints of nature for almost 30 years.

QUALITY IN EVERY DELIVERY

DK // Moland Gruppen er blandt Skandinaviens førende leverandører af kvalitetsgulve og tilbehør. Vi elsker duften af træ og vil vise det levende materiale fra sin bedste side i hvert eneste produkt.

Vi har i årtier designet, udviklet og skabt de smukkeste, mest harmoniske og mest slidstærke gulve.

Moland Gruppen er en traditionsrig, dansk og fuldt ud familieejet virksomhed. Vi har hovedkontor, showroom og lager i Skive – i bunden af Limfjorden.

Alle vores medarbejdere samarbejder om at sikre høj kvalitet i vores håndværk, materialer og rådgivning. Vi hjælper vores kunder hele vejen gennem alle valgene, når de skal finde det helt rigtige gulv til deres projekt.

UK // The Moland Group is one of Scandinavia's leading suppliers of quality floors and accessories. We love the fragrance of wood and we want to show the best of the living material in every product.

For decades, we have designed, developed and created the most beautiful, most harmonious and most durable floors.

The Moland Group is a traditional Danish, wholly family-owned company. Our headquarters, showroom and warehouse are in Skive, at the end of the Limfjord.

All our employees work together to ensure the high quality of our craftsmanship, material and advice. We help our customers through all selections to find the right floor for their project.

Oak – greatness of nature

THE VIKING'S CHOICE

DK // Eg er verdens mest slidstærke og robuste træart. I vikingetiden blev den brugt til at bygge de skibe, som førte vores forfædre sikkert på togt efter togt.

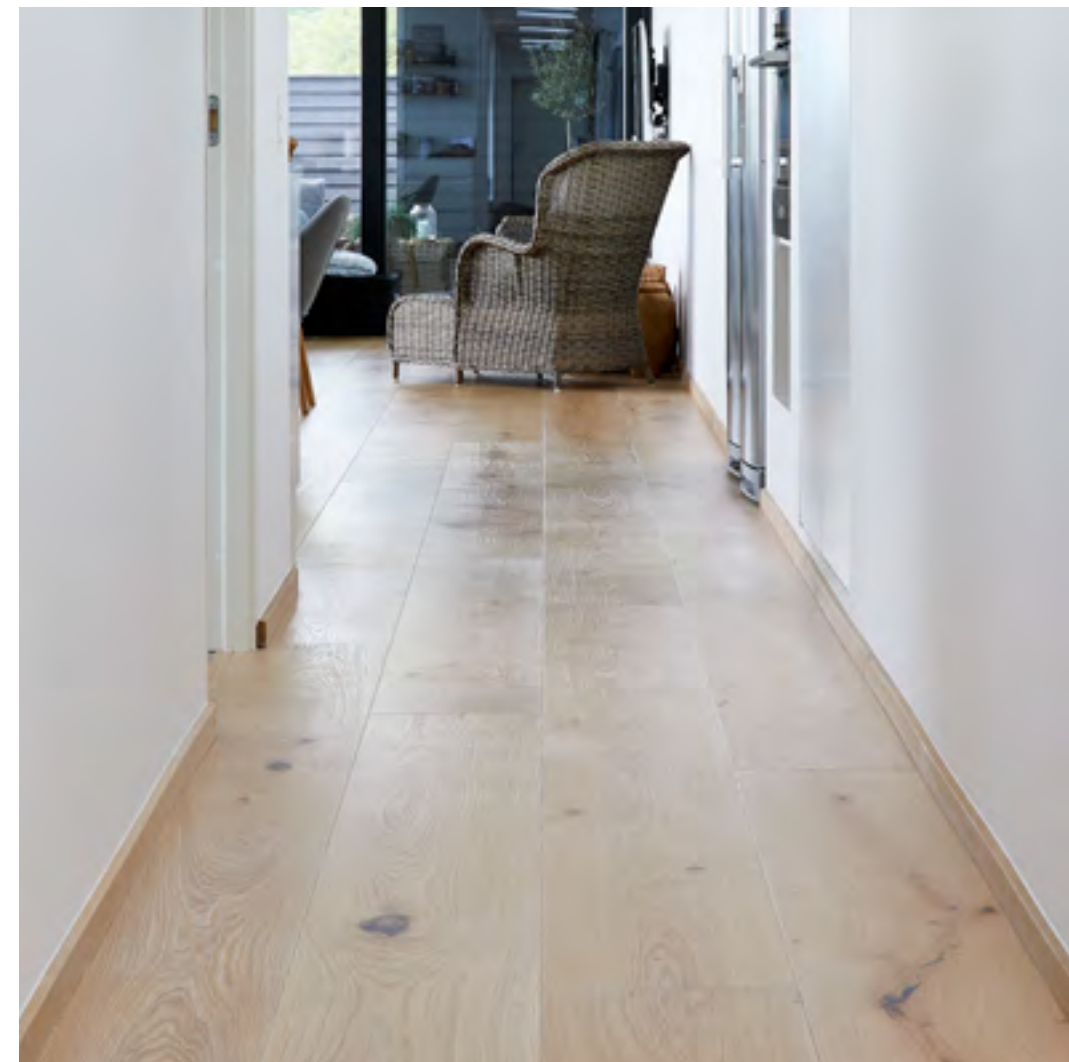

Egetræets store styrke gør det oplagt at bruge til de gulve, som oplever mest slid – fx i offentlige bygninger. Eg er af samme grund også populært at bruge til værktøj, bordplader og andre møbler. Over halvdelen af alle vores gulve fremstilles med egetræ.

I naturen er egetræets imponerende holdbarhed meget synlig. De tunge træer med deres karakteristiske knudrede grene lever normalt flere hundrede år. Danmarks ældste træ, Kongeegen ved Jægerspris, er omkring 1.800 år gammelt.

UK // Oak is the world's most durable and robust tree species. During the Viking era, it was used to build the ships that carried our ancestors safely on expedition after expedition.

The great strength of the oak tree makes it ideal for floors that experience the most wear, for example in public buildings. For the same reason, oak is also popular for tools, table tops and other furniture. Over half of all our floors are made of oak.

In nature, the impressive durability of the oak tree is very visible. The heavy trees with their characteristic knotted branches usually live for hundreds of years. Denmark's oldest tree, the King Oak at Jægerspris, is about 1,800 years old.

A certain affection for ash

STRONG AND DURABLE

DK // Den slidstærke træart ask har været brugt til gulve i mange generationer og er den næstmest populære i vores produktion. Europæisk ask har et unikt farvespil mellem det mørke kernetræ og træets helt lyse ved.

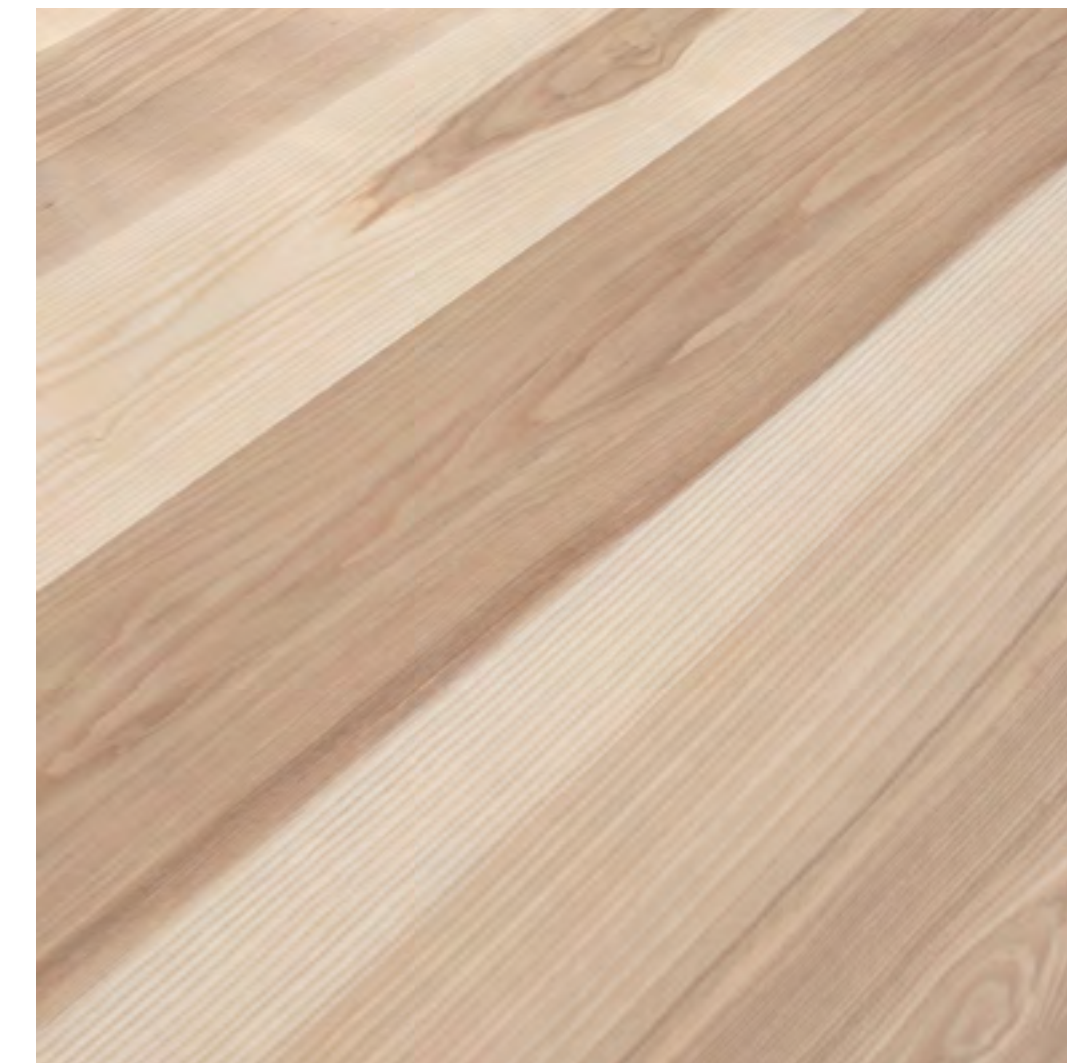

Ask er kendt for at give et levende og lyst udtryk til ethvert rum. Det flotte spil i nuancerne har været med til at gøre træet dominerende i den skandinaviske designtradition.

I naturen kan askens ranke og lysegrå stammer stå i op til 300 år. Ask skal som regel være mellem 50 og 80 år, inden det er egnet til at fælde. Træerne er altså stadig unge, når de får nyt liv som gulve. Ask er også populært i flittigt brugte produkter som sportsrekvisitter, redskaber, møbler og finér.

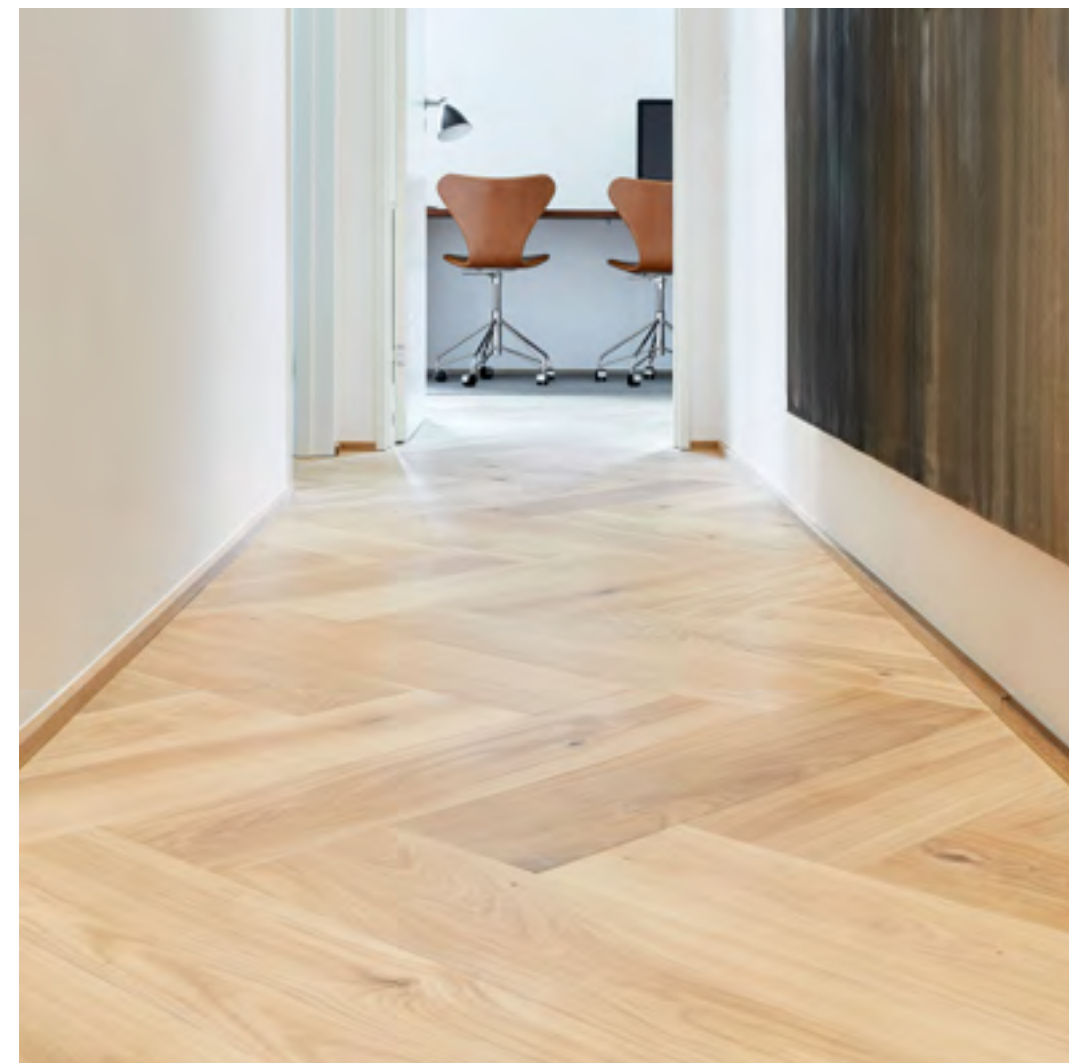

UK // The durable species of tree, the ash, has been used for floors for many generations and is the second most popular wood in our production. The European ash has a unique colour scheme with its dark heartwood and very light sapwood.

Ash is known for giving any room a vibrant, bright appearance. Its variation in nuances has helped to make this tree dominant in the Scandinavian design tradition.

In nature, the pale, light grey trunk of the ash can last for up to 300 years. As a rule, an ash tree has to be between 50 and 80 years old before it is ready to be felled. The trees are still young when they get a new life as floors. Ash is also popular in widely used products such as sports supplies, tools, furniture and veneers.
