

# moland® High Performance Laminate

When you can't compromise on quality!

## Moland laminate flooring

Moland High Performance Laminate is Moland's new product line of elegant 1-strip and modern tiles.

Our laminate floors feature contemporary design with uncompromising quality.

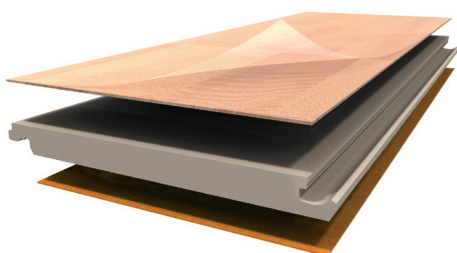

The surface is unusually durable and resists fading, even with direct sun exposure. With its authentic texture, the floor brings a warm and inviting atmosphere to the room.

## Construction

The surface is robust and wear-resistant, with a natural surface design. The core is constructed of non-buckling HDF board, with a backing that ensures a stable product free of warping.

## Utility class

Utility class 23/32 AC4. This means that Moland High Performance Laminate can be used in all private homes, no matter how heavy the traffic, and in most commercial settings with normal traffic, such as offices, shops and waiting rooms.

## Certification

All Moland High Performance Laminate is PEFC-certified – the seal of approval for sustainable forest management. This means our laminate floors are produced with respect for nature.

## Design

Moland High Performance Laminate is part of our Design family with both vinyl and bio-flooring. Highly durable, yet easy to maintain, these floors bring an appealing visual impression to your home.
